

What's new

SaloneSatellite is back again this year, an event geared to fostering contact between young designers and exhibiting companies. In addition to their own prototypes, the participants will be asked to present one or more projects focused on the products showcased at the Kitchen and Bathroom biennial exhibitions. There will be a competition for the 3 best products in the 2 sections involved. This year there will also be a montage conceived by 5 young architects/designers, previous participants in SaloneSatellite, again under the supervision of Ricardo Bello Dias.

The Event is back: the Saloni will be back with the level of quality and variety of goods that have made it the mouthpiece and trendsetter for the entire sector. ■

Pure Village: a imm cologne la comunità del design

Si chiama Pure Village il nuovo format espositivo proposto a imm cologne 2010, Salone Internazionale del Mobile (19-24/1/2010). Nel padiglione 3.2, grandi e piccoli marchi trovano spazio in una scenografia che riproduce l'intimità di un villaggio.

In uno spazio compatto, gli ultimi sviluppi di design sono presentati fianco a fianco con arredi classici, design sperimentale, tessuti per la casa, carte da parati, tappeti, illuminazione e accessori, prodotti che altrimenti avrebbero difficoltà a trovare un terreno comune. ■

Pure Village: at imm cologne a Community for Design

Pure Village is the new format at the international furnishing show imm cologne (19-24 January 2010). In Hall 3.2 the best ideas and visions of both major players and smaller labels will be showcased in the intimacy of a village-like setting.

In a compact space, the latest developments in furniture design are "next-door neighbours" with classics, experimental design, home textiles, wallpapers, carpets, lighting and accessories, products that would otherwise have a hard time finding common ground. ■
